

E-DELPHYN CT

e-Delphyn CT is particularly developed for healthcare organizations that manage cell therapy products.

Features

Management of blood collection, processing and storage to ensure a correct distribution and administration of high quality advanced cell therapy products. Full traceability features and process controls to help organizations and hospitals comply with international FACT & JACIE standards.

Thanks to its high configurability, it can adapt to different digital workflows through control, submission and sending/receiving forms that can be customized according to the specific needs of each client.

Workflow

Control of haematological procedures
